

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site name:	Ingersoll Rand
Applicant Name:	Ingersoll Rand Company
Site location:	1105 North Williams Street Angola, IN 46703 Steuben
VRP Site No.:	6980504
Project Manager:	Thoma Mattox
Date received:	05/1998
Date completed:	09/2001
Project duration:	3 years, 4 months
Contaminant(s):	VOC
Media addressed:	Surface/Sub-surface Soil Groundwater
Cleanup Objectives Achieved:	Tier II Non-residential
Deed/Land use restrictions:	Property shall remain non-residential

Project Description:

This site entered the VRP to address a chlorinated solvent plume detected under the facility. The contamination appears to be the result of historic practices. The plume was addressed by the installation and operation of a soil vapor extraction system. Upon completion of the remediation, confirmatory sampling indicated that the site had successfully been remediated of VOC's in the surface soil, sub-surface soil, and groundwater.
